Objectives

This training event will concentrate on one of the four major research topics of the MARATONE project, and one of the four pillars of the 2008 EU Pact on Mental Health and well-being: human rights and ethics in mental health. The aim is to set the stage for the e-learning to follow by introducing the ESRs to basic concepts and propositions of national and international human rights law - focusing on the impact of the United Nations Convention on the Rights of Persons with Disabilities (CRPD) – as well as the fundamental ethical values of autonomy and dignity that play out in concrete ethical dilemmas in mental health practice and research.
